## Workshop materials

sba

Workshop slides are available here:

**[biblioingegneribernardi.cab.unipd.it/bibliocentrale/usa/laboratori/materiali/materiali](http://biblioingegneribernardi.cab.unipd.it/bibliocentrale/usa/laboratori/materiali/materiali)**

## Bibliographic research steps

sba

- Identify your topic and keywords
- Choose the proper tools (catalogues, databases... )
- Collect and evaluate useful documents (articles, papers, technical reports... )
- Create your bibliography using the correct citation style and citing the source

# What are Bibliographic Databases?

sba

- A **bibliographic database** is a database of bibliographic records, an organized digital collection of references to published literature, including journal and newspaper articles, conference proceedings, reports, government and legal publications, patents, books, etc. In contrast to library catalogue entries, a large proportion of the bibliographic records in bibliographic databases describe articles, conference papers, etc., rather than complete monographs, and they generally contain very rich subject descriptions in the form of keywords, subject classification terms, or abstracts.
- A **bibliographic database** may be general in scope or cover a specific academic discipline.

# Why use Bibliographic Databases?

sba

- Bibliographic databases allow you to **use keywords** to search across thousands of different journal titles and conference proceedings at the same time for papers in a specific subject area.
- This **saves you a lot of time** as you do not have to search through individual publications.
- The papers have been through some form of "**quality control**" to ensure that the information is more reliable and valid than information you may find by searching the internet (better than Google search!).
- Bibliographic databases allow you to **create a structured search** by helping you to identify relevant keywords, to combine keywords together and to limit your search.
- Bibliographic databases give you the citation or reference details about the articles you have found so that you can **locate the full text**.
- Bibliographic databases usually **provide links to the abstract or summary** of the article so that you can evaluate its relevance.
- If the University has an electronic subscription to the journal or conference proceedings, you will **have online access to the full text** of the paper.
- Bibliographic databases **are regularly updated** giving you access to the most current research.

# (Engineering) Bibliographic Databases

sba

- **Web of Science** (Thompson Reuters bibliographic and citation database of peer-reviewed literature)
- **Scopus** (Elsevier bibliographic and citation database of peer-reviewed literature)
- **Engineering Village** (Compendex is the most comprehensive interdisciplinary engineering database in the world)
- **IEEE Xplore** (full-text electrical engineering, computer science, and electronics bibliographic database)
- **Business Source Premier** (bibliographic database about management, economics, finance, business... )
- **Reaxys** (Reaxys is a web-based search and retrieval system for chemical compounds, bibliographic data and chemical reactions)

## ■ WEB OF SCIENCE

The screenshot shows the IEEE Xplore Digital Library advanced search interface. At the top, there are links to IEEE.org, IEEE Xplore Digital Library, IEEE-SA, IEEE Spectrum, and More Sites. A search bar contains the text "Cerca". Below the header, the page is titled "Advanced Search Options". The search form includes fields for entering keywords or phrases, selecting fields, and choosing operators (AND, OR). It also features a "CONTENT FILTER" section with options for All Results, My Subscribed Content, and Open Access, and a "PUBLISHER" section showing results from IEEE (3,797,904) and Alcatel-Lucent (6,313). On the right side, there is a "LEARN MORE ABOUT" panel with links to Data Fields, Search Examples, Search Operators, and Search Guidelines.

**RefWorks** is an online research management, writing and collaboration tool.

It is designed to help researchers easily gather, manage, store and share all types of information, as well as generate citations and bibliographies.

You can:

- import, organize and save references taken from bibliographic databases, books, web pages or other sources
- format bibliographies automatically in several referencing styles
- insert bibliographies and citations directly into a text

## How to access RefWorks

sba

- „ You can consult RefWorks from any University computer, or from home.
- „ You can find information and tutorials:

**<https://bibliotecadigitale.cab.unipd.it/en/refworks>**
